Pitch Ready® 2026

The Problem

Best-practice return-to-sport decisions are too often **rationed by budget**. Testing gets booked reactively, one athlete at a time — and the most powerful evidence of all, **proof of normality before return to play**, is the first thing cut when funds are tight.

Pitch Ready PRO removes the logistical constraints with best-practice care. One fixed annual partnership puts gold-standard practice at the front of all decisions — both the men's & women's programs for **every athlete in the top squad**.

THE PRO DIFFERENCE

Built on **over 20 years in professional sport**, PRO offers a unique combination of **scientific rigour** and **practical implementation** — robust 3D biomechanical analysis, clinical advice and rehabilitation intensives. **End-to-end backing** for your high-performance team.

The Solution

One fixed annual partnership.

Whole squad access across the season, replacing repeated one-off testing with a fixed annual partnership.

Unlimited RTS Testing

- Gold-standard **ACL & lower-limb** benchmarking
- 3D **sprint & acceleration** kinematics
- We capture, analyse & advise — end to end

Pre-Season Screening

- Unlimited **pre-injury profiling**
- Protect **marquee-player** availability
- Specific focus for players who are **new**, or with **injury history**

Rehab Intensives

- Face-to-face blocks with **Tim McGrath (PhD)**
- Data-led, expert targeted programming — **ACL & lower-limb injury**
- Utilise as much or as little as needed **across the rehab journey**

Case Conferencing

- Independent **expert sounding board**
- Clarity on complex clinical cases
- De-risk decisions made under season pressure
